JumpStart! is a **FREE, 2-part** workshop reviewing the course-specific math topic and study skills that students need to know to be successful in their math classes. Workshops are held the week before classes begin to **JumpStart!** your math mastery!

Part 1

Math Survival Skills Workshop

Friday, August 17 | 1–3pm | LA 200

Math not your favorite subject? Been a while since your last math class? Need a little motivation? Then this seminar is for YOU! Participate in a math study skills inventory and learn the specialized classroom, homework, and test-taking skills math students need to be successful in their math classes.

Part 1 is recommended to all students prior to taking the Part 2 math topic skills workshops.

Part 2

JumpStart 1500

Wednesday, August 22 | 7–9pm | Online Webinar

JumpStart! 1500 includes a review of basic geometric skills including angles, area and perimeter of polygons, area and circumference of circles, special triangles and the Pythagorean Theorem.

JumpStart 2000

Tuesday, August 21 | 7–9pm | Online Webinar

JumpStart! 2000 includes a review of fractions, decimals, percent and order of operations.

JumpStart 4000

Monday, August 20 | 7–9pm | Online Webinar

JumpStart! 4000 includes a review of expressions, linear equation solving, graphing lines, exponent rules, and factoring polynomials.
