Mathematics - 2012-2013 CATALOG

People have referred to mathematics as the universal language. Wherever you go in the world, math equations and formulas remain the same. It is a gateway language into understanding the world around you. Whether you're buying groceries, budgeting your finances, or fueling your car, you encounter numbers and calculations on a daily basis. From Intermediate Algebra for College Students, Business Mathematics, Mathematics for Elementary Teachers, to Calculus for Business and Social Science, the various mathematics courses emphasize the usefulness of math for personal and social applications, as well as educational and occupational goals.

WHY CHOOSE A COURSE IN MATHEMATICS?

Because...

You want to learn how to better manage your money and understand the interest rates you see in credit card bills and bank loans.

You want to improve your problem solving skills.

You want credits that may count toward your associate degree.

You want credits that may transfer toward a four-year degree.

Mathematics courses are identified by the prefix MATH.

For More Information

Visit www.schoolcraft.edu where you can view course and program information, schedule a campus tour, apply for admission, register for courses, and request more information.

Contact the Admissions and Enrollment Center at 734-462-4426 with additional questions.
