

YOUR CAREER OPPORTUNITY

YOUR ONLINE PROGRAM in Aviation Management

The aviation and space industry offers career opportunities in many areas to suit a variety of interests and backgrounds. Aviation remains an integral part of our society and will continue to grow and need qualified personnel.

The best jobs go to people with the right combination of experience and education. Typically, those with a college background earn higher pay and have more opportunities to advance.

The Aviation Management program at Schoolcraft provides broad exposure and knowledge opportunities in key areas of aviation. It is designed for students beginning aviation studies and for those individuals already employed in the field who would like to enhance their knowledge and skills.

The program offers both a skills certificate and an associate degree. Individual courses may also be taken to meet specific needs and interests. All courses are available online providing students with maximum flexibility for study.

Aviation Management Associate Degree

Schoolcraft program code # AAS.00261

The Aviation Management Associate Degree program provides a broad exposure to key areas of aviation, leading to an associate degree. This program will prepare a student for a career in aviation or for additional education in the field.

For a more detailed description of the courses, please visit our Web site at www.schoolcraft.edu.

FACULTY

Instructors are recognized experts in the fields of management and airport operation. As a mix of academicians and aviation industry leaders, they provide an important link between the curriculum and the industry.

ADVISORY COMMITTEE

In addition to expert aviation faculty, the Schoolcraft Aviation Management program receives guidance and review from a program advisory committee. Committee members include executives in airport management, airlines, corporate aviation, aviation maintenance, government, law and education.
