

FY 2019 FIVE-YEAR CAPITAL OUTLAY PLAN

I. MISSION STATEMENT

Schoolcraft is a comprehensive, open door, community-based College. The mission of the College is to provide a transformational learning experience designed to increase the capacity of individuals and groups to achieve intellectual, social, and economic goals.

The Vision: The College wishes to be a first choice provider of educational services, a competent organization, functioning with integrity, behaving strategically, and providing value beyond expectations.

College Values:

- We recognize the students are our reason for existence and that student success is paramount to our mission.
- We pledge to follow ethical practices in the classroom, boardroom, business operations, and all other areas of the College.
- We value diversity in our students, staff, and programming.
- We are committed to having a positive intellectual, social, and economic impact on the communities we serve.
- We strive to achieve leadership in academics, management practices, employee relations, and institutional innovation.
- We strive to maintain a supportive, cordial, and aesthetically pleasing environment for our students, staff, and community.
- We encourage lifelong learning for our students and staff by providing the most current programs, utilizing the most effective instructional delivery methods.
- We believe that higher education should be accessible to the greatest number of our constituents.

II. INSTRUCTIONAL PROGRAMMING

a) Description of various existing academic programs and projected programming changes during the next five (5) years, in so far as academic programs are affected by specific structural considerations (i.e. laboratories, classrooms, current and future distance learning initiatives, etc.).

Traditional Classrooms and Labs

Schoolcraft College offers 91 certificate and associate degree programs in career areas such as Nursing, Culinary Arts, Computer Information Systems, Public Safety/Homeland Security, and Business. The 91 certificates and associate degrees are made up of 15 skills certificates, 38 one-year certificates, 4 post-associate certificates, and 34 associate degrees. In addition, the College offers 8 major areas of transfer that include Applied Science, Arts, Business, Education, Engineering, Fine Arts (including Theater), General Studies and Science (including Pre-Pharmacy). Student majors are roughly 50% career and 50% transfer.

For Fall 2017, Schoolcraft College has 10,852 credit students enrolled with 73% seats filled. While overall enrollment has slowed, the demand for courses remained steady with fewer students taking more credits, especially in general education, sciences, mathematics, technology, and career offerings. This growth has strained classroom facilities and labs in several areas. The most critical have been Math/Engineering, Science, and Technical disciplines. These areas show the greatest growth potential based upon the strength of our programs in the community as well as the future job market.

Fall 2017 classes began August 28. As of October 2, 2017, the number of late starting classes were as follows:

Modality	# Late Starting 12-week classes (Begin 9-19-17)	# Late Starting 7-week classes (Begin 10-24-17)
Traditional Classes	85	30
Online Classes	192	48

Enrollment is monitored daily from the first day of registration through the last day to enroll for 2nd 7-week courses to identify trends and courses filling early and/or throughout the registration process. Just-in-time courses are added to the current offerings, when possible, to meet the needs of students. For Fall 2017, 46 additional courses were offered after registration began.

There continues to be a critical need for specific space at the Radcliff Center, but in most cases it is at a very limited time (evening classes) and we have been able to manage the space effectively. The most needed revision would be the upgrade of the Biology Lab to get us to the BIOL 236 level. The majority of our allied health programs require BIOL 236 - Human Anatomy and Physiology. Our current Biology Lab located at the Radcliff campus does not support the technology requirements to offer BIOL 236, thereby forcing EMT, HIT, and MAS students to take the class at the Livonia campus.

The Allied Health programs that are housed at Radcliff include, Emergency Medical Technology (EMT), Health Information Technology (HIT), Health Coding/Specialist, Medical Assisting (MA), and Massage Therapy (MAS). Additionally, Schoolcraft College is a Michigan Department of Community Health approved sponsor for EMT programs enabling the College to increase college credit offerings and provide continuing education courses. Through our Medical Assisting program, the College is also now recognized as a National Center for Competency Testing. With the addition of our recent HIT Computer Lab, we have been able to meet the needs for increased numbers returning to acquire ICD-10-CM coding skills.

Credit hour offerings have increased by the following percentages since Fall 2011:

Physics	13%	Mathematics	2%
Chemistry	5%	Biology	6%

These growth rates are indicative of the addition of "distance learning" courses that were developed in these disciplines, as well as adding Friday and Saturday courses in Physics. This is not always an option in Biology and Chemistry as these courses must meet three days a week, due to the high number of contact hours involved. Growth for "traditional" courses in these disciplines has been halted for some time, as we lose the ability to add sections due to limited lab space.

Alternative Delivery

The College actively supports alternative deliveries of instruction that meet the needs of working/commuting students. These include online, hybrid (a combination of face-to-face and online), Open Entry/Open Exit (OE/OE), and accelerated courses.

In Fall 2017, over 6,219 seats were filled in online courses. This semester offers 103 different courses comprising 261 sections.

The Open Entry/Open Exit program has over 699 students (as of September 21, 2017) enrolled in 42 different courses. OE/OE courses are offered in diverse areas such as Accounting, Art, Biology, Business, Computer Aided Design, Computer Information Systems, Collegiate Skills, Environmental Technology, English, Geography, History, Humanities, Math, Music, Office Information Systems, Political Science, and Sociology. Enrollment opportunities in OE/OE courses extend through October 19, 2017. OE/OE enrollment hit its peak in 2009-2010, and has experienced some decline in enrollment as the College increases the availability of fully online courses. However, the OE/OE program plays a vital role in supporting student retention in occupational courses increasing their access to instructors, hardware, and software needed for successful course and program completion.

Hybrid courses were first offered in Spring 2004. The number of courses and sections available continues to increase. The popularity of this modality grows, for example, in Fall 2005, there were a total of 11 courses comprising 14 sections. In Fall 2017, there were a total of 27 courses comprising 40 sections.

These alternative deliveries have impacted the physical space in several ways:

- The rapid growth of distance learning precipitated a need for additional online support staff, training capabilities for new faculty, and centralized resource development for preparation of coursework.
- Open Entry/Open Exit requires different structural space in a lab format to meet the needs of students. As a result of additional course offerings and growing enrollment, the OE/OE program has been given lab space in the College's Biomedical Technology Center that opened Fall 2008. The BTC lab serves as the "house" for the OE/OE program and as an open lab for all registered Schoolcraft students.
- Accelerated courses have created a demand for more flexible scheduling to deliver more course work in fewer calendar days with longer class sessions.
- b) Unique characteristics (i.e. two-year degree and certificated technical/vocational training; workforce development training activities; adult education focus; continuing or lifelong educational programming; partnerships with intermediate school district(s), community activities; geographic service delivery area(s), articulation agreements or partnerships with four-year institutions, etc.).

Schoolcraft College is a two-year community college offering one Bachelor's Degree and a variety of associate degrees and certificates, as well as skill-specific certifications. For 2016-2017 there were 17,875 credit students who attended the College and 13,704 students who were registered for continuing education/adult education-type programs. The College operates a Business Development Center that since 1985 has been one of the largest contributors for new government contracts awarded to Michigan businesses with over \$2.8 billion infused into the local economy. Since 2011, the Center has also helped small businesses obtain over \$37 million in financing and has helped launch over 58 small businesses. In 2016, the Center also provided training to over

1,600 workers at 72 companies in technical and professional areas to enhance their skills on the job.

The College's official geographic boundaries consist of several Michigan school districts: Livonia, Plymouth-Canton, Northville, Garden City, and Clarenceville. The College has two locations in Livonia, and a satellite center in Garden City.

Schoolcraft College partners with the Galileo Leadership Consortium in a special program called "Galileo Leadership Academy" to prepare leaders to improve learning in their classrooms, departments, schools, districts, and community colleges. This year 130 teachers and faculty from 30 school districts, two community colleges, and one university participated in the program from Wayne, Oakland, and Macomb Counties. The total number of Galileo Leaders trained to date is over 970 strong.

The College maintains articulation agreements or partnerships with many Michigan universities and the K-12 districts within the College's district boundaries as well as outside the district boundaries. In partnership with Michigan universities, Schoolcraft has 54 articulation agreements with 20 colleges, universities, and technical institutions. Several of the articulation agreements are 3+1 programs that allow students to complete the first three years at the community college and the final year at a university, resulting in great monetary savings for students. In addition, the College maintains several unique partnerships including the King-Chavez-Parks program (University Bound) with Wayne State University. The College has 32 articulation agreements with 5 secondary schools for 56 Schoolcraft College courses. Currently 10 programs of study exist with Livonia Public School's CTE programs, Garden City has 4 programs, and Wayne-Westland has 14 programs granting Schoolcraft College credit through articulation. Additional agreements exist with Airport Public Schools and the Lenawee Intermediate School District. The College will continue to increase partnerships with area high schools and four-year universities to create pathways for students to progress seamlessly toward a certificate, credential, employment, or post-secondary education.

When the College opened its Biomedical Technology Center in Fall 2008, the focus of the Center was to expand the offerings in math and science. New labs for Molecular and Cellular Biology and Anatomy and Physiology have supported studies for many allied health programs. New labs for engineering and Electron Microscopy support the Biomedical Engineering Technology, Sciences, Materials and Metallurgy, and Electronics programs. Additional classrooms for mathematics support all Career and Technical Education programs as this is a general education requirement for degree completion. New courses in advanced manufacturing and plastic technology have been developed. Most of the Career and Technical programs that utilize classes in the building have work-based learning (clinicals, internships, etc.) as part of their curriculum (nursing, biomedical engineering technology, etc.).

c) Initiatives which may impact facilities usage.

Changes in credentialing requirements will drive increased need of Certified Medical Assistants and a growth in enrollment. The greatest need for additional space may fall in the areas of computer labs, at this time, however, we are managing with more creative scheduling. The Pharmacy Tech initiative will call for significant classroom changes with renovations in one area and again, creative scheduling to best utilize existing computer lab space.

Healthcare simulation technology facilities are now open and will impact facility use by making possible the development of cross-discipline activities between Nursing, Emergency Medical Technology, and Allied Health programs. In addition, the partnerships fostered between the College and local hospitals and healthcare professionals wishing to make use of the Health

Professions Simulation Lab will expose our students to encounters with industry professionals not often afforded to community college students.

d) Demonstration of economic development impact of current and future programs (i.e. technical training centers, life science corridor initiatives, etc.).

Having a trained work force is critical to the economic development of Michigan. Businesses choose to locate and expand in areas where there is a pool of people with the needed job skills, and communities are safe and supportive of business. Schoolcraft, through its Business Development Center and Corporate Training Services, helps entrepreneurs as well as established businesses grow their markets, secure new funds, and train their staff.

Schoolcraft College offers many career and technical programs for students seeking an education and the skills to enter the job market or to advance their current careers. For several years the College has offered a "Small Business for Entrepreneurs Associate Degree" and a "One-Year Certificate." The College's career programs are based on both the students' interests and community employment needs. Advisory Boards for each career and technical education area are composed of faculty and industry leaders and professionals. Advisory board input is critical to the continued improvement of career programs and preparation of our students for their occupations. Competencies and program outcomes incorporated into occupational programs prepare students to enter challenging specialized careers after two years of college or less. Instructors emphasize job-specific knowledge, and students can pursue most programs full- or part-time. Schoolcraft tracks job placement in high demand, high skill, and high wage employment to ensure students find jobs.

Current programs, certificates, and courses are continually reviewed and updated for modernization and continuous quality improvement as well as to meet changing business and industry requirements. Scanning of job market sites, newspaper ads, business needs, assessment surveys, advisory committee input, and Department of Labor job forecasting help Schoolcraft stay current with job market demands and provide valuable information/data to drive program initiation. Newly developed environmental scans produced by the College's Research and Analytics department have provided a wealth of information about the prospects and outlook for viability of new educational programs based on reliable data. Enrollment trends are evaluated on a semester-by-semester basis to determine student interest and are reviewed for program expansion or contraction.

To increase access for all students to career and technical education programs, many of the courses in these programs are offered through the College's various modalities such as online, Open Entry/Open Exit, and hybrid, as well as traditional classrooms. For students balancing work, life, and an education, the availability of flexible scheduling affords them the opportunity to complete their education.

The College's Continuing Education and Professional Development Department (CEPD), is offering more classes aimed at preparing people for the workplace and building career and technical skills. This includes certificate programs, such as Pharmacy Technician and Personal Fitness Trainer, and computer classes geared toward workplace applications. Additionally, courses in specific content areas such as accounting, event planning, and continuing nursing education are offered through continuing education. Still more credit and non-credit programs have been submitted to the state for approval for funding through the Michigan Works Agencies. A growing partnership with the K-12 districts in the Schoolcraft district is likely to result in additional course offerings in teacher professional development.

With health care emerging as Michigan's number one private employer, Schoolcraft is offering both short-and long-term programs in Phlebotomy, Medical Billing, Coding Specialist, Nursing Assistant Training, Massage Therapy, and the Nursing Career Ladder Curriculum program.

National employment forecasts through 2024 project employment requiring an associate's degree will increase by 8.7%, compared to 3.9% for high school diploma or equivalent, 11.5% for postsecondary non-degree award, 8.2% for bachelor's degree, and 13.8% for master's degree. The top five "hot" occupations (favorable mix of projected long-term job growth, projected annual job openings, and median wages) in Southeast Michigan through 2022 that require an associate's degree/vocational training include Computer User Support Specialists, Dental Hygienists, Electricians, Industrial Machinery Mechanics, and Licensed Practical and Licensed Vocational Nurses.

Schoolcraft College actively participates with a number of Economic Development organizations including:

- Advance Michigan Center for Apprenticeship Innovation (AMCAI)
- Ann Arbor Spark
- Ann Arbor/Ypsilanti Regional Chamber
- Association of Procurement Technical Assistance Centers (APTAC)
- Association of Small Business Development Centers (ASBDC)
- Automation Allev
- Canton Chamber of Commerce
- Detroit Regional Chamber of Commerce
- Garden City Business Alliance
- HR Manufacturing Roundtable Plymouth
- I-275 Industrial Council
- Learning Resources Network (LERN)
- Livonia Chamber of Commerce
- Michigan Association of Continuing Education and Training (MACET)
- Michigan Chamber of Commerce
- Michigan Coalition for Advanced Manufacturing (MCAM)
- Michigan Department of Licensing and Regulatory Affairs (LARA)
- Michigan Department of Talent and Economic Development (TED)
- Michigan Economic Developers Association (MEDA)
- Michigan Economic Development Corporation (MEDC)
- Michigan Energy Workforce Development Consortium (MEWDC)
- Michigan Life Science Innovation Center
- Michigan Small Business Development Center (MI-SBDC)
- Michigan Talent Investment Agency (TIA)
- Michigan Workforce Development Agency
- Midwest Higher Education Compact (MHEC)
- National Association of Community College Entrepreneurship (NAACCE)
- National Contract Management Association (NCMA)
- National Council for Continuing Education and Training (NCCET)
- National Defense Industrial Association (NDIA)
- Northville Chamber of Commerce
- Novi Chamber of Commerce
- Novi Economic Development
- Plymouth Chamber of Commerce
- PTACs of Michigan
- Small Business Association of Michigan (SBAM)

- Southeast Michigan Community Alliance (SEMCA)
- Southeast Michigan Community College Consortium (SMC3)
- Southeast Michigan Council of Governments (SEMCOG)
- Wayne County Economic Development Corporation (WCEDC)
- Westland Chamber of Commerce
- Workforce Intelligence Network for Southeast Michigan (WIN)

III. STAFFING AND ENROLLMENT

a) Describe current full and part time student enrollment levels by academic program and define how the programs are accessed by the student (i.e. main or satellite campus instruction, collaboration efforts with other institutions, internet or distance learning, etc.).

Enrollment for Fall 2017 late-starting classes continues through October 31, 2017. As of September 29, enrollment for Fall 2017 had reached 10,852. For the fiscal year 2016-2017, Schoolcraft College had 17,875 credit students enrolled. In addition to traditional students, Schoolcraft College has a strong base of students in Continuing Education, enrolling 13,704 students during the academic year. Continuing Education courses include contracted training, certification programs, professional development, and personal development. As of Fall 2017, of the College's credit students 67% attend on a part-time basis (less than 12 credit hours) and 33% attend on a full-time basis (12 credit hours or more); 50% of our students reside within our College district and 50% reside outside of the College's district (including international students).

Our student population can also be defined by attendance type as follows:

Student Attendance by Type	Number of Students
Day Only	2,157
Evening Only	1,147
Distance Learning (Online) Only	1,589
Distributed Learning (OE/OE or Hybrid) Only	609
Combination (traditional, online, OE/OE, Hybrid, day, evening, and weekend)	5,350

As shown in the following charts, 50% of Schoolcraft College's credit students are enrolled in transfer programs. Another 33% are enrolled in associate or certificate career programs, and 17% are enrolled in special programs such as post-certificate programs, skills certificate programs, and pre-programs (completing course requirements for admissions into Associate Degree programs).

The 5 largest populated programs are in Engineering (transfer), Criminal Justice, General Studies Associate (transfer), Liberal Arts (transfer), and Business Administration (transfer). Some programs cap their enrollment based upon available resources (space, staffing, clinical sites, etc.), such as Culinary Arts, Nursing, and the Criminal Justice Academy.

Students can gain access to academic programs through multiple venues. In addition to our main campus in Livonia, some programs can be completed at our satellite campus in Garden City, including Allied Health programs in Health Information Technology, Medical Assisting, Emergency Medical Technology, and Medical Transcription and Public Service programs in Fire Technology, Homeland Security, and Criminal Justice. Students can also access programs through a combination of traditional, hybrid, Open Entry/Open Exit, and online courses. Currently active for Fall 2017 are 1,051 sections available as traditional, combo, global, independent learning, and

MCO (formerly VLC) courses, 40 sections available as Open Entry/Open Exit courses, 33 sections available hybrid, and 260 online sections. The alternative instructional delivery methods have experienced the fastest growth.

Enrollment in Fall 2017 by Program Majors and Full-time/Part-time

For the charts below, enrollment is divided into part-time students (less than 12 credit hours), full-time students (12 or more credit hours), and Other (18 or more credit hours).

One-Year Certificates	177	462	20	659
Associate and Bachelor's Degrees	940	1,855	50	2,845
Post-Associate Certificates	6	19	0	25
Transfer	1,829	3,324	38	5,191
Totals	3,438	6,925	110	10,473

NOTE: This report reflects students enrolled in more than one major.

b) Projected enrollment pattern next five (5) years (includes distance-learning initiatives).

The following chart shows annual unduplicated student credit enrollments and the projections for the next five years.

Year	Credit Enrollment
2008	18,349
2009	19,559
2010	20,784
2011	20,969
2012	20,458
2013	20,247
2014	19,307
2015	18,855
2016	18,115
2017	17,875
2018	17,696
2019	17,519
2020	17,344
2021	17,171
2022	16,999

Italics = projection of 1% enrollment decline

Alternative Delivery Courses: Current Enrollment/Future Growth

The growth of alternative delivery courses in the past several years has been rapid and steady. Students have more access to computers and are accustomed to alternative delivery methods such as online and Open Entry/Open Exit courses.

Students Enrolled Exclusively In:	Fall 2017
Online Courses	1,605
Open Entry/Open Exit Courses	144
Online and Open Entry/Open Exit Courses	70

c) Evaluate enrollment patterns over the last five years.

The table below provides the headcount for each Fall Semester for the past five years taken at the end of the late registration/schedule adjustment period (Fall 2017 run October 6, 2017).

	2017	2016	2015	2014	2013
Fall Headcount	10,852	11,495	11,671	11,682	12,386

d) Provide instructional staff/student and administrative staff/student ratios for major academic programs or colleges.

For the 2016-2017 academic year, the student (17,875) to instructional staff (531) ratio was 33:1. Instructional staff includes both full-time and part-time faculty members. The ratio for students to administrative staff (55) was 325:1. Administrative staff includes executives and administrators.

e) Project future staffing needs based on 5-year enrollment estimates and future programming changes.

The following chart shows annual staffing figures (includes both full-time and part-time employees) and the projections for the next five years.

Year	Staffing (FT & PT)
2008	835
2009	855
2010	895
2011	881
2012	854
2013	841
2014	845
2015	832
2016	835
2017	815
2018	823
2019	831
2020	839
2021	847
2022	852

Italics = projection of 1% employee growth

f) Identify current average class size and projected average class size based on institution's mission and planned programming changes.

In general, class size has been a result of negotiated contracts between the College and faculty union. While the previous contracts allowed for a degree of flexibility, no major modifications occurred in the 31:1 maximum class size ratio. Section size may vary depending on room capacity and may be discipline specific. For example, the Computer Information System class sizes are determined by computer workstations in the lab, with a seat count in most of these courses ranging from 20-24 seats.

The average class size for 2016 was 18 students per course and included enrollment in alternative delivery courses.

IV. Facility Assessment

a) Summary description of each facility according to categories outlined in "net-to-gross ratio guidelines for various building types," DMB-Office of Design and Construction Major Project Design Manual, appendix 7. If facility is of more than one "type," please identify the percentage of each type within a given facility.

See Exhibit A.

b) Building and/or classroom utilization rates to industry standards.

Room Utilization Methodology

For Schoolcraft College the heaviest demand by students for classes falls into two categories: Daytime - Monday through Thursday, 8:00 a.m. -2:00 p.m.; Evenings - Monday through Thursday, 6:00 p.m. -10:00 p.m. However, we have reported room utilization based on the parameters set forth in this section of the capital outlay as follows:

•	Peak	Monday through Friday	10:00 a.m. – 3:00 p.m.
•	Off Peak	Monday through Friday	8:00 a.m. – 10:00 a.m.
•	Off Peak	Monday through Friday	3:00 p.m. – 5:00 p.m.
•	Evening	Monday through Thursday	5:00 p.m. – 10:00 p.m.
•	Weekends:	Friday	5:00 p.m. – 10:00 p.m.
		Saturday & Sunday	8:00 a.m. – 10:00 p.m.

Final Total	81.3%	80.0%	72.7%	51.7%	21.2%

c) Mandated facility standards for specific programs, where applicable.

Many of our programs require specialized classrooms/labs such as Welding, Manufacturing, Metallurgy, Nursing, Recording Technology, Child Development, Police and Fire Academies, EMT, and Medical Assisting.

d) Functionality of existing structures and space allocation to program areas served.

See Renovation Priorities and Major Maintenance Priorities (under Section V, part b) and <u>Exhibit A</u>.

^{**} These are very specialized labs that are open only when a class is in session or when an instructor is present in the lab because of the equipment present.

e) Replacement value of existing facilities (insured value of structures to the extent available).

Annually R.A. Schettler, Inc., an independent certified appraisal service, establishes the replacement value of the College's buildings. The most recently completed version was on October 1, 2017 and the summation is included in Exhibit B.

f) Utility system condition.

See Exhibit A.

g) Facility infrastructure condition.

See Exhibit A.

h) Adequacy of existing utilities and infrastructure systems to current and 5-year projected programmatic needs:

The IT Infrastructure project is complete. Utilities and other infrastructure systems will need to be extended to incorporate additional parking and buildings anticipated over the next five years.

i) Does the institution have an enterprise-wide energy plan? What are its goals? Have energy audits been completed on all facilities, if not, what is the plan/timetable for completing such audits?

The College has a written 5-year Energy Plan with the goals of providing energy savings and associated cost avoidance. The plan includes several energy conservation measures that will be investigated and implemented over the next 5 years. An energy audit has been conducted in all our buildings. We are working with DTE to evaluate the replacement of all our parking lot lights to LED lighting.

j) Land owned by the institution; include a determination of whether capacity exists for future development, if additional acquisitions are needed to meet future demands, or surplus land can be conveyed for a different purpose.

The College has performed a long range master planning exercise identifying several building sites on main campus. The College has been working extensively with the City of Livonia to identify city properties that can be reestablished as academic properties particularly the city owned landfill, which was converted to a Public Safety Driving Pad.

The College has a building site in the center of main campus, along with potential sites to the northeast and along the eastern and southern perimeters.

k) What portions of existing buildings if any, are currently obligated to the State Building Authority and when are these State Building Authority leases set to expire.

The Business and Industry Training Center and Waterman Campus Center Expansion (VisTaTech) is leased to the State and will expire in approximately January 2019. The Technical Services Facility (Biomedical Technology Center) is leased to the State and will expire approximately November 1, 2043.

V. IMPLEMENTATION PLAN

a) Prioritize major capital projects requested from the State, including a brief project description and estimated cost, in the format provided.

Project Title: Forum Building Renovation and Expansion for Sciences and Humanities

The purpose of the project is:

- To create dedicated and additional spaces for humanities programs (i.e. arts and music).
- Provide Music Programs with spaces with better acoustics and less sound transmission into adjacent spaces.
- Repurpose Forum Building instructional spaces vacated by humanities programs for science.
- Address the current need for more Biology and Physics offerings.
- Modernize interior Forum Building laboratory spaces having 10-20 years of service life, while reconfiguring them to better support current instructional means and methods.

Total Estimated Cost: \$22,500,000 (excludes FF&E; parking lot; IT/communications/AV hardware; testing / special inspections; and commissioning)

b) Define the impact of addressing deferred maintenance and structural repairs, including programmatic impact, immediately versus over the next five years.

<u>Exhibit A</u> outlines the total deferred maintenance backlog of the College by building showing the costs of doing the repairs immediately and the additional cost that is accrued the longer the repairs are deferred. This information is taken from our 10-year Deferred Maintenance plan that has been created by Schoolcraft with the help of an outside architectural firm and is maintained by Schoolcraft's Department of Construction and Design.

Continuing to defer the maintenance needed in these buildings limits the amount of expansion that Schoolcraft can offer to its students. With limited lab and classroom space for particular programs, wait lists have to be created instead of allowing more students into the in-demand programs. Additionally, some of the classrooms need an update in technology to bring the classrooms to current Schoolcraft standards.

Major Maintenance (2019 - 2023)

Year 2019	
Secondary Electrical Replacement Phase 1 (WCC)	\$ 200,000.00
Administration Flat Roof & Fascia Replacement	\$ 55,000.00
PE Roof Replacement - NE Mechanical	\$ 107,000.00
Replace Forum Entry/Ramp Tile	\$ 25,000.00
Service Building Windows	\$ 65,000.00
Replace LA Interior Doors and Hardware	\$ 100,000.00
Parking Lot Sealcoating	\$ 50,000.00
Campus Sidewalk Replacements	\$ 30,000.00
Year Total	\$ 632,000.00

Waterman Wing Roof Replacement	\$	75,000.00
Rebuild Parking Lot - Main Campus Center	\$	300,000.00
Water Main Replacements	\$	150,000.00
Secondary Electrical Phase 2 (A/F)	\$	150,000.00
Campus Sidewalk Replacements	\$	30,000.00
Parking Lot Sealcoating	\$	50,000.00
Year Total	\$	755,000.00
Year 2021		
Fascia Replacement (SB/WCC)	\$	100,000.00
Secondary Electrical Phase 3	\$	250,000.00
Secondary Electrical Subpanels	\$	250,000.00
Rebuild Parking Lot - Main Campus South	\$	1,500,000.00
Parking Lot Sealcoating	\$	60,000.00
Campus Sidewalk Replacements	\$	60,000.00
Year Total	\$	2,220,000.00
Year 2022		
PE North Roof Replacements - Pool/NE Mechanical Room	\$	220,000.00
Service Building Roof Replacement	\$	115,000.00
Administration Flat Roof & Fascia Replacement	\$	55,000.00
Year Total	<u>Ψ</u> \$	390,000.00
Teal Total	Ψ	390,000.00
Year 2023		
Rebuild Parking Lot - Main Campus North	\$	1,250,400.00
Year Total	<u>Ψ</u> \$	
Teal Total	Ф	1,250,400.00

Renovation Priorities (2019 - 2023)

	1 -	/
Year 2019		
Capital Outlay - Forum Science and Humanities Renovation & Addition	\$	22,500,000.00
Year Total	\$	22,500,000.00
Year 2020		
Liberal Arts Classroom Renovations (20)	\$	1,400,000.00
Renovate 2 Children's Center Classrooms	\$	125,000.00
Waterman Student Activities - Phase 2 Renovation	\$	178,000.00
Computer Room Upgrades - Phase 2	\$	200,000.00
Year Total	\$	1,903,000.00
Year 2021		
FTC and ATC Parking Lot Replacements	\$	750,000.00
Renovate DDC (Duplication/Design Center)	\$	100,000.00
Waterman Student Activities - Phase 3 Renovation	\$	500,000.00

Renovate 2 Children's Center Classrooms	\$ 125,000.00
Renovate 4 BTC Classrooms	\$ 240,000.00
Year Total	\$ 1,715,000.00
Year 2022	
Waterman Wing Atrium	\$ 250,000.00
Renovate Campus Classrooms	\$ 600,000.00
Year Total	\$ 850,000.00
Year 2023	
BTC Simulation Upgrade	\$ 850,000.00
Expand Cold Storage and Add Utilities	\$ 150,000.00
Renovate Campus Classrooms	\$ 600,000.00
Year Total	\$ 1,600,000.00

c) Include the status of on-going projects financed with State Building Authority resources and explain how completion coincides with the overall 5-year plan.

There are no on-going projects financed with the State Building Authority resources at this time.

d) Identify, to the extent possible, a rate of return on planned expenditures.

Not applicable.

e) Where applicable, consider alternatives to new infrastructure, such as distance learning.

We currently offer a wide variety of distance learning, hybrid, and OE/OE classes and have been experiencing enrollment increases each year.

f) Identify a maintenance schedule for major maintenance items in excess of \$1,000,000 for fiscal year 2019 through fiscal year 2023.

See Major Maintenance Priorities and Renovation Priorities (under section V, part b).

Fiscal Year 2019 Capital Outlay Project Request

Institution Name: Schoolcraft College

Project Title: Forum Building Renovation and Expansion for Sciences and Humanities

Project Focus: Academic

Type of Project: Addition & Renovation

Program Focus of Occupants: <u>Sciences and Humanities</u>

Building Area Calculations (approximates):

Current: 55,516 Square Feet (includes detached Greenhouse that is part of Proposed Additions)

With Proposed Additions: 32,500 square feet, 2-story addition with 13,200 square feet basement and

2,100 square feet connector between current building and addition

Total Estimated Cost: \$22,500,000 (excludes FF&E; parking lot; IT/communications/AV hardware;

testing / special inspections; and commissioning)

Estimated Start / Completion Dates:

Construction: May 2019 – Start / August 2021 – Completion. Scope involves phased work within Forum Building that will be partially occupied throughout construction

Is the Five-Year Plan posted on the institutions public internet site? Yes

Is the requested project the top priority in the Five-Year Capital Plan? Yes

Is the requested project focused on a single, stand-alone facility? Yes

Project Purpose:

- 1. To create dedicated and additional spaces for humanities programs (i.e. arts and music).
- 2. Provide Music Programs with spaces with better acoustics and less sound transmission into adjacent spaces.
- 3. Repurpose Forum Building instructional spaces vacated by humanities programs for science.
- 4. Address the current need for more Biology and Physics offerings.
- 5. Modernize interior Forum Building laboratory spaces having 10-20 years of service life, while reconfiguring them to better support current instructional means and methods.

Project Scope:

Renovation of Forum Building

- Renovate / update toilet facilities.
- Reconfigure / expand Biology and Physics Labs.
- Reconfigure / update Chemistry Labs.
- Relocate / update Geology and Geography Labs.
- Create a Food Science Lab.
- Upgrade Classrooms.
- Convert / renovate a lecture theatre into a Music Performance theatre.
- Reconfigure / update faculty office bays.

Addition Basement Basis

- Size: 13,200 SF @ 12-FT high.
- Primary Uses: Utility service entrances; main mechanical / electrical room(s); IT MDF closet;
 Facilities Management primary storage rooms; and Instructional Programs secondary storage.
- Secondary Uses (as necessary): Computer Graphics Technology (CGT) instructional labs; Music Labs; and Faculty Offices.

Forum Building-to-New Building Addition Connector Basis

- Size: 2,100 SF @ 12-FT high slab-on-grade with curtain wall features allowing for maximum daylighting.
- Primary Uses: Building connector corridor; displaying artwork from traditional hand-drawing, computer generated artwork, and ceramics work.

First & Second Floor Basis

- Size: 32,500 SF @ 12-FT high.
- Primary Uses: See table below.
- First Floor Features: Art Gallery; Ceramics Labs; Computer Graphics Technology (CGT)
- Second Floor Features: High-level introduction of daylight; planetarium dome.

NEW CONSTRUCTION – FIRST & SECOND FLOORS	
AREAS (SF)	SPACE FUNCTIONS
2,100	ART GALLERY (INCORP INTO CONNECT HALL/LOBBY)
4,800	CERAMICS LAB (2 @ 2,400 SF /24 STUDENTS EA)
2,150	CGT COMP LAB (2 @ 950 SF EA W/ 250 SF COMMON)

800	CGT COMPUTER LABS (ONE PHOTO / VIDEO LAB)
2,500	PERFORMANCE LAB (50 STUDENT W/ STORAGE)
2,800	SRT LAB (24 STUDENT - CURRENTLY 12 PERSON)
1,800	MUSIC PRACTICE RM (6 @300 SF EA)
950	PIANO LAB (24 STUDENT - DOUBLE SIZED LAB
2,400	PLANETARIUM (BASED ON 30 STUDENTS WITHIN 28-FT DIAMETER
	DOMED ROOF)
1,070	FACULTY OFFICES (10 @ 80 SF EA W/ CIRC SPACE)
250	OFFICE BREAK AREA
365	CUSTODIAL CLOSETS - TOTAL
973	TOILET ROOMS - TOTAL
486	UTILITY ROOMS / CLOSETS (PLUS LL MAIN UTILITY)
6,721	CORRIDOR & LOBBY SPACES CIRCULATION SPACE
3,000	PROGRAM STORAGE (1,500 SF @ 1ST & 2ND FLOORS EA)

<u>Additional New Construction - Greenhouse Relocation Basis</u>

- Reasons: To permit interconnection between Forum Building and new building addition.
- Size: 1,125 SF (approx. twice the floor area of current greenhouse).
- Primary Uses: Biology.
- Secondary Uses: Food Science and Bio Research.

Additional Information:

1. How does the project enhance Michigan's job creation, talent enhancement, and economic growth initiatives on a local, regional, and/or statewide basis?

The U.S. Bureau of Labor Statistics projects that, during the period 2010-2020, employment in S&E occupations will grow by 18.7%, compared to 14.3% for all occupations. Approximately 59% of the projected increase in S&E jobs is in computer/mathematical scientist occupations. These occupations also have the largest growth rate (23.1%). Biological/agricultural/environmental life scientists and social scientists/psychologists have the next highest projected growth rates: 20.4% and 18.5% respectively. Health care practitioners and technicians, a non-S&E occupational category that contains significant numbers of S&E-trained people, is projected to grow by 25.9%.

From: STEM Education Data and Trends – U.S. Dept. of Labor

2. How does the project enhance the core academic and/or research mission of the institution?

The mission of Schoolcraft College is to provide a transformational learning experience designed to increase the capacity of individuals and groups to achieve intellectual, social, and economic goals. The Forum Building Renovation and Expansion for Sciences and Humanities project allows for Schoolcraft College to update its facilities, locate like programs within the same building, and expand upon current programs and seamlessly integrating new programs. This project would allow to create learning facilities for students to prepare them for the work environment by following advisory committee and local business recommendations.

3. How does the project support investment in or adaptive re-purposing of existing facilities and infrastructure?

33,532 square feet of 55,000 square feet of 1963 constructed Forum Building would receive modernizations within existing building envelope.

4. Does the project address or mitigate any current health/safety deficiencies relative to existing facilities? If yes, please indicate.

Project Scope would include security system upgrades that involve ID card access system with emergency lockdown readers in each instructional space. The addition of higher resolution, CCTV security cameras would be included as well.

5. How does the institution measure utilization of its existing facilities, and how does it compare relative to established benchmarks for educational facilities? How does the project help to improve the utilization of existing space and infrastructure, or conversely how does current utilization support the need for additional space and infrastructure?

Schoolcraft College tracks room utilization for all classrooms and labs. Room Utilization reports are generated on a semester by semester basis. Adding specialized labs that are needed such as biology, chemistry and physics, would free up the more general spaces for additional sections of other in-demand courses. Expansion of our classroom and lab space will allow us to add additional seats in current courses as well as offer additional course offerings to better serve the needs of existing and future students.

6. How does the institution intend to integrate sustainable design principles to enhance the efficiency and operations of the facility?

It is intended that this project, at minimum, would employ these fundamental principles of sustainable building:

- Optimizing Site Potential by reuse of an existing building.
- Optimizing Energy Use by improving energy performance of an existing building.
 Starting with energy efficient light fixture upgrades and introducing daylighting and occupancy lighting control schemes.
- Optimize Building Space and Material Use by designing for use and reuse of building materials in a fashion most productive and sustainable.
- Enhancing Indoor Environmental Quality (IEQ) through updated ventilation systems.
- Acoustical performance improvements for Music Program both internal (improved sound reverberation) and external (lessoning sound transmission into adjacent spaces).
- 7. Are match resources currently available for the project? If <u>yes</u>, what is the source of the match resources? If <u>no</u>, identify the intended source and the estimated timeline for securing said resources.

Yes, the College currently has match proceeds for the project, including local support and land lease proceeds.

8. If authorized for construction, the state typically provides a <u>maximum</u> of 75% of the total cost for university projects and 50% of the total cost for community college projects. Does the institution intend to commit additional resources that would reduce the state share from the amounts indicated? If so, by what amount?

The College does not have any plans or sources at this time that would reduce the state's share from the amount indicated.

9. Will the completed project increase operation costs to the institution? If yes, please provide as estimate cost (annually, and over a five-year period) and indicate whether the institution has identified available funds to support the additional cost.

The additional operating costs that may come from the Forum Building Renovation and Expansion for Sciences and Humanities project would be: custodial and supplies, utilities, maintenance and supplies, insurance, and security. These costs have been estimated to be approximately:

Per Square Foot Annually:

Custodial & Supplies - \$1.60/square foot

Utilities - \$2.66/square foot

Maintenance and Supplies - \$1.43/square foot
Insurance - \$.27/square foot
Security - \$.34/square foot

\$6.30/square foot

Annual Estimated Cost - \$ 126,000 Five-Year Estimated Cost - \$ 630,000

The College receives free natural gas from the oil well it houses on campus which will help to offset the additional costs the additions will add to the Forum building.

10. What impact, if any, will the project have on tuition costs?

The Forum Building Renovation and Expansion for Sciences and Humanities would have no impact on Schoolcraft's tuition costs.

11. If this project is not authorized, what are the impacts to the institution and its students?

If this project was not authorized Schoolcraft College, its students, and in ways the community would be effected for these primary reasons.

- ADA compliance-improvements for toilet rooms and addressing original, ramped corridor floors too steep for barrier-free ramp slope compliance.
- Shortage of Biology Labs needed to infeed allied health programs; such as Nursing (i.e. student retention impact).
- Difficulty providing instruction with modern teaching methodologies and technologies (i.e. student experience impact).
- Nutrition program would have to continue working out of spaces shared with and intended for other programs or operational functions. Where this renovation would provide a Food Science Lab and dedicated Green House space.
- Less opportunities for K-12 and Public involvements in science (planetarium access) and humanities (art and music participation / appreciation).

12. What alternatives to this project were considered? Why is the requested project preferable to those alternatives?

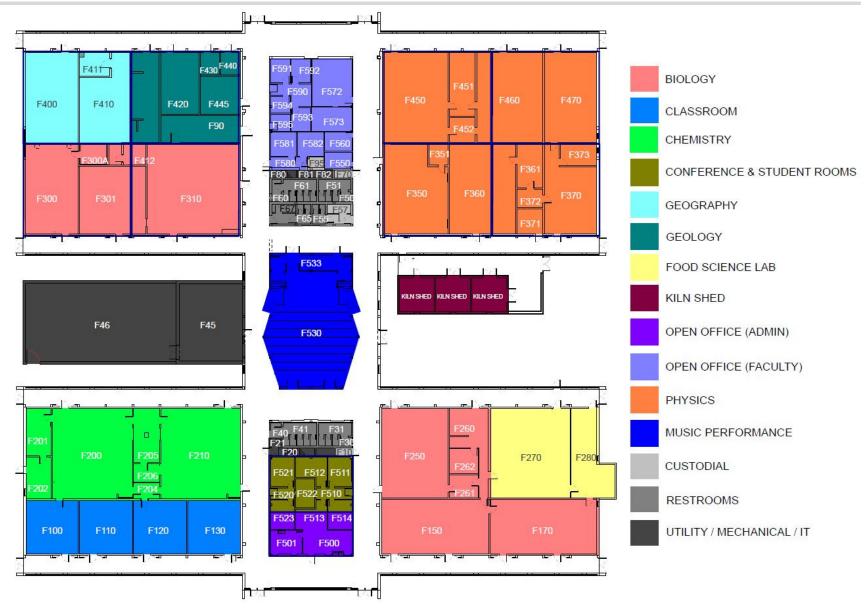

This project approach is considered to be the best option considered. The other option here being a stand-alone humanities building.

There are cost-reductions for this approach. For example, a stand-alone humanities building would need a newly constructed Music Performance theatre to make it practical for musicians and faculty to move from pre-performance prep spaces to the performance venue. The proposed project would make use of a new connecting corridor that leads to a renovated lecture theatre existing in Forum Building. Likewise, science classes within Forum Building could access a planetarium in the new constructed Humanities Addition vs. cost to modify 1963 construction to convert the existing lecture theatre – that at first pass appears unfeasible.

The location of the proposed Humanities Addition gives it the opportunity for air-conditioning via existing, campus thermal (ice) storage loop. System capacity is confirmed to exist. There is also potential for expanding hot water heater boiler service from Forum Building centralized boilers to Humanities Addition.
